Subsequently, in the period from August of 2002 and January of 2003, this research group has carried out a study subsidized by the Ministry for Public Works [B.O.E. (Spanish Congressional Record) no. 43, Ministerial Order FOM/312/2002) with the object of analysing the incidence of subcontracting in occupational hazard prevention in the construction of transport infrastructure in Andalusia. This work carried out by professors Menéndez Ondina, Rubio Gámez, Rubio Romero and Pérez Pérez, has allowed to know the current situation of occupational hazard prevention in the construction of roads and the AVE (high speed train).

The ex-president of the Spanish Economic and Social Council (CES), Federico Durán, author of a report on work safety commissioned by the Government two years ago, regrets that Public Administration has not applied the suggestions of the report presented in March of 2001, like training in PRL.

This research group has set in motion the Certificate of University

Expert “Coordinator of Safety and Health in Construction Work”, officially approved by labor authorities as “Advanced Expert in Occupational Hazard Prevention from the School of Civil Engineers, to promote construction experts training.

Prevention is still a matter pending for the Spanich system, especially in construction, with figures much higher than other countries members of the EU, even though they have common regulations.
