## Spain dig fails to find poet Lorca's remains

Raquel Castillo  
MADRID  
Fri Dec 18, 2009 3:05pm EST

MADRID (Reuters) - Excavations in southern Spain have failed to find the remains of Spanish poet Federico Garcia Lorca, whose 1936 killing became a symbol of a brutal civil war, a forensic report said on Friday.

PEOPLE | LIFESTYLE

Digging got under way last month on the rocky hillside believed for decades to have been an unmarked grave, and the failure casts doubt on whether Garcia Lorca's body will ever be found.

"No remains of human bones have appeared or other signs belonging to civil war graves," a report by the University of Granada's Archaeology Department said.
